PROFESSIONAL SUMMARY

Implementation Project Manager leading client-facing technology implementations across healthcare payments, enterprise document management, cloud migrations, and automation. Builds project plans, charters, status reporting, and governance that align clients, business analysts, developers, QA, IT, vendors, and customer-service teams through requirements, UAT, go-live, and transition. Skilled in dependency, change, and stakeholder management.

CORE COMPETENCIES

Project Delivery: Implementation lifecycle | Microsoft Project & WBS | Project charters | Schedule and baseline management | Requirements/BRD coordination | UAT and go-live readiness | RAID/change control | Status reporting | Client leadership

Tools & Technical: Microsoft Project, Excel, PowerPoint, AutoTask, ConnectWise, GoHighLevel, iManage Work 10, ChatGPT, Claude | Healthcare payments, secure data exchange, SFTP/TLS, SSO/SAML, APIs, cloud/DMS migrations, CRM automation

PROFESSIONAL EXPERIENCE

Implementation Project Manager

06/2026 - Present

ECHO Health, Inc.

Westlake, OH

- Lead client implementations of healthcare payment solutions across initiation, readiness, requirements, configuration, testing, go-live preparation, training, and post-launch transition.
- Built and maintain a 107-day Microsoft Project schedule with 150+ activities, assigned resources, linked dependencies, milestones, baseline controls, and re-baselining checkpoints for an active client implementation.
- Create project charters, project plans, kickoff and readiness materials, stakeholder contact lists, status reports, and implementation documentation to establish scope, governance, ownership, and decision paths.
- Coordinate clients, business analysts, developers, QA, IT, account teams, vendors, and customer service across data-file development, SFTP/TLS, SSO/API setup, banking validation, reporting, and provider/member communications.
- Drive client prerequisites, BRD approvals, action items, risks/issues, change requests, multi-round UAT, go-live controls, training, production validation, and customer-service handoff.

Project Manager

10/2023 - 06/2026

Blue Technologies Smart Solutions

Cleveland, OH

- Managed 4-6 month enterprise iManage Cloud and on-premises implementations from kickoff through closeout for legal, government, and financial-services clients, including environments of up to 150 users and 1.2 million documents / 2 TB.
- Led weekly client and internal project meetings, coordinating consultants, engineers, third-party vendors, and customer stakeholders while maintaining action, decision, and dependency accountability.
- Maintained project plans, implementation checklists, milestones, projected and actual dates, risks/issues, status notes, training, testing, migration, SSO/integration, cutover, and handoff activities.
- Tracked \$100,000+ implementation scope, timelines, and resource allocation in AutoTask and ConnectWise; managed formal change requests by assessing cost, resource, schedule, and deliverable impacts.
- Coordinated training and go-live readiness and facilitated lessons-learned sessions by interviewing technical SMEs, synthesizing improvements, and preparing customer-facing closeout documentation.

Independent Project Manager / Automation Consultant

01/2025 - Present

Independent Projects

Remote

- Lead remote teams of 2-4 developers to deliver CRM automation and AI-enabled marketing workflows for startup clients using GoHighLevel.
- Manage scope, plans, task ownership, stakeholder communication, delivery checkpoints, and launch coordination while designing onboarding workflows and operational automations.

EDUCATION & CREDENTIALS

Bachelor of Business Administration - Marketing & Communication Minor | Malone University, Canton, OH | 05/2022

- Certified iManage Project Manager
- PMP Exam Preparation - 35 contact hours completed
- Software Developer Certificate - We Can Code IT | 08/2023
